说明

SN55LBC173 是一款具有 3 态输出的单片四路差动线路接收器, 此接收器被设计成符合 EIA 标准 RS-422-A, RS-423-A, RS-485 和 CCITT V.11。这个器件针对数据速率高达且超过每秒 1 千万位的平衡多点总线传输进行了优化。4 个接收器共用 2 个进行或操作的使能输入, 一个在高电平时有效, 一个在低电平时有效。每个接收器在 12V 至 -7V 的共模输入电压范围内特有高输入阻抗、输入滞后以增加抗扰度, 以及 ±200mV 的输入灵敏度。故障安全设计确保了在输入为开路时, 输出始终为高电平。SN55LBC173 使用德州仪器 (TI) 已获专利的 LinBiCMOS™ 技术进行设计, 这个技术提供了低功耗、高开关速度和稳健耐用性。

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

Green: TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.
