

## SN74AUP1G32 低功耗单路双输入正或门

### 1 特性

- 采用间距为 0.5mm 的超小型 0.64mm<sup>2</sup> 封装 (DPW)
- 低静态功耗  
( $I_{CC} = 0.9 \mu A$ , 最大值)
- 低动态功耗  
( $C_{pd} = 4.3pF$ , 3.3V 时的典型值)
- 低输入电容 ( $C_I = 1.5pF$ , 典型值)
- 低噪声 - 过冲和下冲  
低于  $V_{CC}$  的 10%
- $I_{off}$  支持带电插入、局部断电模式和后驱动保护
- 输入迟滞在  $V_{hys} = 250mV$  (3.3V 时的典型值) 输入下  
可实现缓慢的输入转换和更好的开关噪声抗扰度
- 宽工作  $V_{CC}$  范围为 0.8V 至 3.6V
- 针对 3.3V 运行进行了优化
- 3.6V 耐压 I/O 支持混合模式的信号操作
- 3.3V 时,  $t_{pd} = 4.6ns$  (最大值)
- 适用于点到点应用
- 闩锁性能超过 100mA, 符合 JESD 78 II 类规范的要求
- ESD 性能测试符合 JESD 22 标准
  - 2000V 人体放电模型 (A114-B, II 类)
  - 1000V 带电器件模型 (C101)

### 2 应用

- ATCA 解决方案
- 主动噪声消除 (ANC)
- 数据表末尾条形码扫描仪
- 血压监护仪
- CPAP 呼吸机
- 线缆解决方案
- DLP 3D 机器视觉、高光谱成像、光纤网络和光谱分析
- 电子书
- 嵌入式 PC
- 现场变送器: 温度或湿度传感器
- 指纹生物识别
- HVAC: 暖通空调
- 网络附加存储 (NAS)
- 服务器主板和 PSU
- 软件定义无线电 (SDR)
- 电视: 高清电视 (HDTV)、LCD 电视和数字电视
- 视频通信系统
- 无线数据存取卡、耳机、键盘、鼠标和 LAN 卡
- X 射线: 行李扫描仪、医疗和牙科

### 3 说明

此单路双输入正或门以正逻辑执行布尔函数  $Y = A \bullet B$  or  $Y = \overline{A+B}$ 。

#### 器件信息

| 器件型号        | 封装 <sup>(1)</sup> | 封装尺寸 (标称值)      |
|-------------|-------------------|-----------------|
| SN74AUP1G32 | SOT (5)           | 1.60mm × 1.20mm |
|             | USON (6)          | 1.45mm × 1.00mm |
|             | X2SON (4)         | 0.80mm × 0.80mm |
|             | DSBGA (6)         | 1.19mm × 0.79mm |
|             | DSBGA (5)         | 1.41mm × 0.91mm |

(1) 如需了解所有可用封装, 请参阅数据表末尾的可订购产品附录。

### Pin Functions

| NAME            | PIN           |     |          |     |     | I/O | DESCRIPTION |
|-----------------|---------------|-----|----------|-----|-----|-----|-------------|
|                 | DRL, DCK, DBV | DPW | DRY, DSF | YZP | YFP |     |             |
| A               | 1             | 2   | 1        | A1  | A1  | I   | Input A     |
| B               | 2             | 1   | 2        | B1  | B1  | I   | Input B     |
| GND             | 3             | 3   | 3        | C1  | C1  | -   | Ground      |
| Y               | 4             | 4   | 4        | C2  | C2  | O   | Output Y    |
| V <sub>CC</sub> | 5             | 5   | 6        | A2  | A2  | -   | Power Pin   |

## 6 Specifications

### 6.1 Absolute Maximum Ratings

over operating free-air temperature range (unless otherwise noted)<sup>(1)</sup>

|                 |                                                                                             | MIN                | MAX                   | UNIT    |
|-----------------|---------------------------------------------------------------------------------------------|--------------------|-----------------------|---------|
| V <sub>CC</sub> | Supply voltage range                                                                        | - 0.5              | 4.6                   | V       |
| V <sub>I</sub>  | Input voltage range <sup>(2)</sup>                                                          | - 0.5              | 4.6                   | V       |
| V <sub>O</sub>  | Voltage range applied to any output in the high-impedance or power-off state <sup>(2)</sup> | - 0.5              | 4.6                   | V       |
| V <sub>O</sub>  | Voltage range applied to any output in the high or low state <sup>(2)</sup>                 | - 0.5              | V <sub>CC</sub> + 0.5 | V       |
| I <sub>IK</sub> | Input clamp current                                                                         | V <sub>I</sub> < 0 |                       | - 50 mA |
| I <sub>OK</sub> | Output clamp current                                                                        | V <sub>O</sub> < 0 |                       | - 50 mA |
| I <sub>O</sub>  | Continuous output current                                                                   |                    | ±20                   | mA      |
|                 | Continuous current through V <sub>CC</sub> or GND                                           |                    | ±50                   | mA      |

- (1) Stresses beyond those listed under *Absolute Maximum Ratings* may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under *Recommended Operating Conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) The input and output negative-voltage ratings may be exceeded if the input and output current ratings are observed.

### 6.2 Handling Ratings

|                    |                           |                                                                                          | MIN  | MAX  | UNIT |
|--------------------|---------------------------|------------------------------------------------------------------------------------------|------|------|------|
| T <sub>stg</sub>   | Storage temperature range |                                                                                          | - 65 | 125  | °C   |
| V <sub>(ESD)</sub> | Electrostatic discharge   | Human body model (HBM), per ANSI/ESDA/JEDEC JS-001, all pins <sup>(1)</sup>              | 0    | 2000 | V    |
|                    |                           | Charged device model (CDM), per JEDEC specification JESD22-C101, all pins <sup>(2)</sup> | 0    | 1000 |      |

- (1) JEDEC document JEP155 states that 500-V HBM allows safe manufacturing with a standard ESD control process.
- (2) JEDEC document JEP157 states that 250-V CDM allows safe manufacturing with a standard ESD control process.

### 6.3 Recommended Operating Conditions

| see <sup>(1)</sup> |                           | MIN                               | MAX                    | UNIT |
|--------------------|---------------------------|-----------------------------------|------------------------|------|
| V <sub>CC</sub>    | Supply voltage            | 0.8                               | 3.6                    | V    |
| V <sub>IH</sub>    | High-level input voltage  | V <sub>CC</sub> = 0.8 V           | V <sub>CC</sub>        | V    |
|                    |                           | V <sub>CC</sub> = 1.1 V to 1.95 V | 0.65 × V <sub>CC</sub> |      |
|                    |                           | V <sub>CC</sub> = 2.3 V to 2.7 V  | 1.6                    |      |
|                    |                           | V <sub>CC</sub> = 3 V to 3.6 V    | 2                      |      |
| V <sub>IL</sub>    | Low-level input voltage   | V <sub>CC</sub> = 0.8 V           | 0                      | V    |
|                    |                           | V <sub>CC</sub> = 1.1 V to 1.95 V | 0.35 × V <sub>CC</sub> |      |
|                    |                           | V <sub>CC</sub> = 2.3 V to 2.7 V  | 0.7                    |      |
|                    |                           | V <sub>CC</sub> = 3 V to 3.6 V    | 0.9                    |      |
| V <sub>I</sub>     | Input voltage             | 0                                 | 3.6                    | V    |

- $C_L$  includes probe and jig capacitance.
- All input pulses are supplied by generators having the following characteristics:  $PRR \leq 10 \text{ MHz}$ ,  $Z_O = 50 \Omega$ ,  $t_r$  and  $t_f = 3 \text{ ns}$ .
- The outputs are measured one at a time, with one transition per measurement.
- $t_{PLH}$  and  $t_{PHL}$  are the same as  $t_{pd}$ .
- All parameters and waveforms are not applicable to all devices.

## 8 Detailed Description

### 8.1 Overview

This single 2-input positive-OR gate that operates from 0.8 V to 3.6 V and performs the Boolean function  $Y = A \bullet B$  or  $Y = \overline{A + B}$  in positive logic.

The AUP family of devices has quiescent power consumption less than 1  $\mu\text{A}$  and comes in the ultra small DPW package. The DPW package technology is a major breakthrough in IC packaging. Its tiny 0.64 mm square footprint saves significant board space over other package options while still retaining the traditional manufacturing friendly lead pitch of 0.5 mm.

### 8.2 Functional Block Diagram

### 8.3 Feature Description

- Wide operating  $V_{CC}$  range of 0.8 V to 3.6 V
- 3.6-V I/O tolerant to support down translation
- Input hysteresis allows slow input transition and better switching noise immunity at the input
- $I_{off}$  feature allows voltages on the inputs and outputs when  $V_{CC}$  is 0 V
- Low noise due to slower edge rates

### 8.4 Device Functional Modes

表 8-1. Function Table

| INPUTS |   | OUTPUT<br>Y |
|--------|---|-------------|
| A      | B |             |
| L      | L | L           |
| L      | H | H           |
| H      | L | H           |
| H      | H | H           |

## 9 Application and Implementation

### 备注

以下应用部分的信息不属于 TI 组件规范，TI 不担保其准确性和完整性。客户应负责确定 TI 组件是否适用于其应用。客户应验证并测试其设计，以确保系统功能。

### 9.1 Application Information

The AUP family is TI's premier solution to the industry's low-power needs in battery-powered portable applications. This family ensures a very low static and dynamic power consumption across the entire VCC range of 0.8 V to 3.6 V, resulting in an increased battery life. This product also maintains excellent signal integrity. It has a small amount of hysteresis built in allowing for slower or noisy input signals. The lowered drive produces slower edges and prevents overshoot and undershoot on the outputs.

The AUP family of single gate logic makes excellent translators for the new lower voltage Micro- processors that typically are powered from 0.8 V to 1.2 V. They can drop the voltage of peripheral drivers and accessories that are still powered by 3.3 V to the new uC power levels.

### 9.2 Typical Application

图 9-1. Typical Application Schematic

#### 9.2.1 Design Requirements

This device uses CMOS technology and has balanced output drive. Care should be taken to avoid bus contention because it can drive currents that would exceed maximum limits.

#### 9.2.2 Detailed Design Procedure

- Recommended Input conditions
  - Rise time and fall time specifications. See ( $\Delta t / \Delta V$ ) in [Recommended Operating Conditions](#) table.
  - Specified high and low levels. See ( $V_{IH}$  and  $V_{IL}$ ) in [Recommended Operating Conditions](#) table.
  - Inputs are overvoltage tolerant allowing them to go as high as 3.6 V at any valid  $V_{CC}$
- Recommend output conditions
  - Load currents should not exceed 20 mA on the output and 50 mA total for the part
  - Outputs should not be pulled above  $V_{CC}$

### 9.2.3 Application Curves

## 10 Power Supply Recommendations

The power supply can be any voltage between the Min and Max supply voltage rating located in the [Recommended Operating Conditions](#) table.

Each  $V_{CC}$  terminal should have a good bypass capacitor to prevent power disturbance. For devices with a single supply,  $0.1 \mu\text{F}$  is recommended and if there are multiple  $V_{CC}$  terminals then  $.01 \mu\text{F}$  or  $.022 \mu\text{F}$  is recommended for each power terminal. It is ok to parallel multiple bypass caps to reject different frequencies of noise. A  $0.1 \mu\text{F}$  and  $1 \mu\text{F}$  are commonly used in parallel. The bypass capacitor should be installed as close to the power terminal as possible for best results.

## 11 Layout

### 11.1 Layout Guidelines

When using multiple bit logic devices inputs should not ever float.

In many cases, functions or parts of functions of digital logic devices are unused, for example, when only two inputs of a triple-input AND gate are used or only 3 of the 4 buffer gates are used. Such input pins should not be left unconnected because the undefined voltages at the outside connections result in undefined operational states. Specified below are the rules that must be observed under all circumstances. All unused inputs of digital logic devices must be connected to a high or low bias to prevent them from floating. The logic level that should be applied to any particular unused input depends on the function of the device. Generally they will be tied to GND or  $V_{CC}$  whichever make more sense or is more convenient. It is generally OK to float outputs unless the part is a transceiver. If the transceiver has an output enable pin it will disable the outputs section of the part when asserted. This will not disable the input section of the I.O's so they also cannot float when disabled.

### 11.2 Layout Example

## 12 Device and Documentation Support

### 12.1 接收文档更新通知

要接收文档更新通知，请导航至 [ti.com](https://www.ti.com) 上的器件产品文件夹。点击 [订阅更新](#) 进行注册，即可每周接收产品信息更改摘要。有关更改的详细信息，请查看任何已修订文档中包含的修订历史记录。

### 12.2 支持资源

[TI E2E™ 支持论坛](#) 是工程师的重要参考资料，可直接从专家处获得快速、经过验证的解答和设计帮助。搜索现有解答或提出自己的问题，获得所需的快速设计帮助。

链接的内容由各个贡献者“按原样”提供。这些内容并不构成 TI 技术规范，并且不一定反映 TI 的观点；请参阅 TI 的 [使用条款](#)。

### 12.3 Trademarks

TI E2E™ is a trademark of Texas Instruments.

所有商标均为其各自所有者的财产。

### 12.4 静电放电警告

静电放电 (ESD) 会损坏这个集成电路。德州仪器 (TI) 建议通过适当的预防措施处理所有集成电路。如果不遵守正确的处理和安装程序，可能会损坏集成电路。

ESD 的损坏小至导致微小的性能降级，大至整个器件故障。精密的集成电路可能更容易受到损坏，这是因为非常细微的参数更改都可能会导致器件与其发布的规格不相符。

### 12.5 术语表

[TI 术语表](#) 本术语表列出并解释了术语、首字母缩略词和定义。

## 13 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

<sup>(1)</sup> The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBsolete:** TI has discontinued the production of the device.

<sup>(2)</sup> **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

**RoHS Exempt:** TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

**Green:** TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

- <sup>(3)</sup> MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.
- <sup>(4)</sup> There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.
- <sup>(5)</sup> Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.
- <sup>(6)</sup> Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

**Important Information and Disclaimer:** The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.
