

M Series Connectors ratchet coupling

LEMO Solutions Portfolio

1 ORIGINALS

Your configurable solution

- Self-Latching Push-Pull locking
- Wide & modular range
- Broad application reach
- Indoor & outdoor

Series	B, K, T
	S, E

2 REDEL

Your trusted medical solution

- Medical and Industrial grade plastics
- Device ergonomics
- Electrical safety
- High density & modularity

Series	P
	SP
	MP

3 OPTIMA

Your optimised solution

- Compact & miniature
- Lightweight & low-profile
- High vibration resistance
- IP68 & MIL-STD tested

Series	M
	F
	D

4 SUPREME

Your extreme solution

- High/Low pressure
- Radiation & corrosion
- High Voltage
- Regulated environments

Series	N
	W
	Y

5 SPECIALTIES

Your specialised solution

- Industry standards
- Special configurations
- Historical products

Series	3K.93C.Y, 00 Nim-Camac
	V, 2G/2C, R, ...

6 CABLES

Your unique cable solution

- Design expertise
- In house prototype to production
- Custom cables
- Conductive & hybrid

Series	Technical cables
	Biocompatibility
	Automation & high-flex
	Retractable coil cords
	Ruggedised

SERVICES

Cable assembly services (single-end, double-end, custom harness, overmolding, ...)

Custom solution (connector, cable, device)

Signal integrity end-to-end services

Understanding LEMO's product selection benefits:

Standard versus Special.

LEMO has a +80 years history of developing custom connectivity solutions. Our very broad offering of models combined with our modular insert design results in a range of over 90'000 connector solutions. This vast product portfolio enables you to select the ideal connector configuration to suit almost any specific requirement in the most demanding markets, including yours.

In this product catalogue we have structured our product offering into two categories:

- **STANDARD** products (in blue) – Most commonly used products for which we can ensure the best availability and shorter lead times. For these products a 10 pcs minimum order quantity (MOQ) applies.
- **SPECIAL** products (in orange) – More niche products designed for customers with specific requirements. For these products a higher minimum order quantity (MOQ) will apply, prices might be higher and lead times are typically longer.

And this differentiation between **STANDARD** and **SPECIAL** applies on three different levels:

1. **MODEL** – Outershell / Backshell shape
2. **KEYING** – Alignment key for differentiated mating
3. **SIZE** – Physical dimensions of the connector

Only if Model + Keying + Size are all within the STANDARD product offering, you will have the best availability and shorter lead time. We recommend you find as much as possible the right solution for your connectivity challenge within our standard product offer.

For all other, special products, we recommend you contact your local LEMO representative to discuss your overall project's life span and long-term needs, so we can align your forecast with applicable MOQ quantities.

By clearly distinguishing between Standard and Special products, LEMO ensures maximum flexibility while still offering the perfect solution to fully meet our customer needs.

Introduction

This catalogue provides a complete description of the LEMO M series portfolio. M series connectors are lightweight triple-start ratchet coupling type connectors designed for avionics, military, security, motorsport and heavy duty applications.

The M series is a COTS (Commercial Off-The-Shelf) product, that fulfills the harshest MIL-DTL-38999 requirements in a more compact and lightweight package. It features a very wide range of configurable options to fulfill every applications.

The LEMO engagement for supplying innovative solutions which meets users highest expectations translates through the M series in a highly reliable interconnect solution that helps our customers reduce their maintenance and downtime in critical applications.

The LEMO quality arises from years of expertise in design, manufacturing and quality system where all single M series connectors get identified with a laser engraved part number and production batch number for full traceability from raw materials to fully assembled product.

Product safety notice & disclaimers

Please read and follow all instructions specified on the last page or on our [website](https://www.lemo.com) carefully and consult all relevant national and international safety regulations for your application. Improper handling, cable assembly, or wrong use of connectors can result in hazardous situations.

LEMO products and services are provided “as is.” LEMO makes no warranties or representations with regard to LEMO product & services or use of them, express, implied or statutory, including for accuracy, completeness, or security.

In no event shall LEMO be liable for any direct, indirect, punitive, incidental, special consequential damages, to property or life, whatsoever arising out of or connected with the use or misuse of LEMO’s products.

OPTIMA's M Series

Lighweight and low-profile ratchet coupling connector

The LEMO **M Series** has been designed to meet the demands for applications where **space, weight, and durability** are critical. Designed with a robust **ratchet coupling mechanism**, it delivers secure, reliable connections in **high-vibration** environments, making it an exceptional choice for **UAV, aerospace, military, motorsport** and other demanding industries.

Built to withstand most demanding requirements, the M Series meets and **exceeds MIL-DTL-38999** standards in a more **compact and lightweight** design.

LEMO's M Series offers a wide range of configurations, including **multipole** combinations, **high-speed data** transfer, **high-frequency coaxial** options, **high-power** capabilities, and advanced **fibre optic** solutions.

Grommet or potting:
Ensures consistent
electrical connectivity
in vibrating
environments

Ratchet coupling:
Provides a secure and
reliable connection
in high shock and
vibration environment

Exceed MIL-DTL-38999
standards: Offer higher
endurance cycles
in a lighter and more
compact design

Watertight
and Vacuumtight
in unmated condition:
Enhance protection
for sensitive equipment
in harsh environment

Lightweight and compact
design: Optimized
to save weight and space
for aerospace applications

Dark and non reflective
surface treatment:
ideal choice for defense
and security application

Extended temperature range
(-55°C/+200°C):
Allows deployment in a wide
operational scenarios according
to military & aerospace
MIL-DTL-38999 standards

LEMO's ratchet 3/4 turn connection system

This highly robust 3/4 turn screw locking system is recognized worldwide for the most demanding applications as a safe, secure and quick screw mating system. Its special ratchet mechanisms provides ultra high reliability in the most severe vibrations environments, shocks or pull on the cables.

Triple start thread

Triple start thread

- Very fast coupling nut engagement in the socket
- Stable thread engagement making tilted nut engagement impossible

3/4 turn locking

3/4 turn locking

- Quick and fast connection requiring less than a full turn for complete mating
- Full mating possible with a single hand movement

Spring loaded ratchet system

Spring loaded ratchet on locking nut

- Secure mating in high vibration environments
- No specific mating torque required to secure
- No tools required; hand torquing force is sufficient to secure

Part numbering system

Standard models part numbering system

FGN.2M.319.XLCT = straight plug with key (N), arctic grip, 2M series, multipole type with 19 contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, male crimp contacts and mold stop.

PHN.2M.319.XLMT = free cable socket with key (N), arctic grip, 2M series, multipole type with 19 contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, female crimp contacts and mold stop.

EGN.2M.319.XLN = socket, nut fixing, with key (N), 2M series, multipole type with 19 contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, female print contacts.

Others part numbering system

- **Watertight** (page 16)
- **Vacuumtight** (page 17)
- **High Speed** (page 26)
- **Coaxial** (page 33)
- **High Power** (page 37)
- **Fibre Optic** (page 42)

Standard models

Locking nuts

M Series connectors offer 2 different versions for coupling nut allowing to adapt ergonomics according to use cases.

- The Artic grip offers maximum ergonomics enabling easy manipulation even with gloves from size 0M to 5M.
- The Knurled grip is offer in size MM to 2M for most applications as it offers a good level of grip whilst keeping a very compact overall plug diameter.

Arctic grip (0M-5M)

Knurled grip (MM-2M)

Backshell

M Series connectors offers 2 different standard backshell allowing for various cable assembly attachments.

- The Mold stop offers a special geometry enabling over molding termination for a clean and rugged cable assembly finish.
- The Heatshrink molded shape offers the matching geometry to guarantee a perfect fit with heat shrink molded boots (see page 52).

Mold stop

Heatshrink molded shapes

See page 52 for heatshrink boot

H Y

Vacuumtight model (unmated)

Part numbering system

HYN.1M.305.XLHWGE = socket, nut fixing, with key (N), 1M series, multipole type with 5 contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, female print contacts, vacuumtight, with 4 ground pins and a EPDM o-ring.

Environmental performance

Characteristics	Value	Standard
Operating temperature	-65°C/+180°C	EIA-364-32 1)

Characteristics	Value	Standard
Leakage rate	< 10 ⁻⁷ mbar·l·s ⁻¹	IEC 60512-2-17 test Qk

Note: 1) Method A, condition IV (5 cycles).

HY● Socket, nut fixing, key (N or H to X), printed circuit, vacuumtight (back panel mounting)

PCB fixation (Detail A)

Note: special anti-vibration thread to be used with standard metric screws (not supplied).

Panel cut-out (page 60). PCB drilling pattern (page 63).

FW● Straight plug, key (N or H to X) with square flange
(these models are not IP68 due to the absence of panel sealing)

A black industrial connector with a blue ring and a square mounting flange. The connector has a cylindrical body with a blue ring near the front. The front face shows two gold-colored pins. The side of the body has some markings, including a logo and the number '12'. The connector is mounted on a square flange with four mounting holes.

Note: for heatshrink molded shapes backshell see page 11 and for special backshell see page 45.

A black, L-shaped industrial connector. The main body is cylindrical with a hexagonal grip section. A circular multi-pin connector is attached at a 90-degree angle, featuring a blue ring and several gold-colored pins. The component is shown against a white background.

Note: for special collet backshell see page 45.

**ED● Socket, key (N or H to X) with square flange**

Alignment key

Alignment key and polarized keying system

M series connector model part numbers are composed of three letters. The LAST LETTER indicates the keys corresponding to a particular contact type.

For example, straight plugs with H, N, P, R, U or W keys, are fitted with male contacts; whereas with S, T, V or X keys, plugs are fitted with female contacts. Sockets with H, N, P, R, U or W keys, are fitted with female contacts; whereas with S, T, V or X keys, sockets are fitted with male contacts.

MM to 3M	Front view of a socket	Model	Colour code	Gender	Contact type		Nb of spurs

LM.232										26.5	<1.50			

Note: ¹⁾ recommended cable Times microwave LMR-100A or Multiflex_86 to reach 26.5 GHz.

Typical VSWR performance curve

Coaxial contact type 0R 50 Ohms:

Enable to reach a frequency up to 8 GHz with a VSWR of 1.2 and up to 26.5 GHz with a VSWR of 1.5 when terminated with 1 meter Times microwaves LMR100 or Multiflex_86.

Coaxial contact type C 75 Ohms:

Enable to reach a frequency up to 17.5 GHz with a VSWR of 1.35 when terminated with 1 meter cable RG 179.

Dummy contacts

The use of a dummy contact allows sealing of unused cavities in both LM.232 (12x coax) and 3M.204 (4x coax) configurations, enabling greater flexibility in system design.

A single dummy contact is compatible with both plug and socket connectors and provides enhanced protection up to IP50 or up to IP68 when potted.

Warning: According to application safety standard, the maximum operating voltage must be determined considering both connector and cable electrical characteristics.

● Standard ● Special

Note:

- 1) test voltage according to IEC 60512-4-1 test 4a; test voltage for connector only. Altitude correction factor is given in IEC 60664-1 § 6.8.
- 2) see derating curves for more information.
- 3) the specified rated current can be applied simultaneously to all the contacts. It corresponds to an average temperature rise of 40°C of the connector (measured according to IEC 60512-5-1 test 5a).
- 4) rated current per contact (on all contact) simultaneously.
- 5) sequential connection: first mate/last break High Power contacts.
- 6) see LV contacts dimensions on page 25.
- 7) with heatshrink boot.

Both plugs and sockets provide IP2X finger protection to comply with the IEC61032 standard.

Derating curves

The derating curve is a current-carrying capacity curve showing which currents may flow continuously via the connector subject to various ambient temperatures. It includes a safety factor (0.8) to protect from spikes and factor uncertainties in temperature measurement.

For example, ambient temperature for connectors on e-Formula 1 batteries is around 50°C. At that temperature, the current that can go through a 10 mm² cable is 120A; it is 130A at 25°C and goes down to 95A at 100°C (see chart on the side).

It's therefore important to always clarify the ambient operating temperature & required current to select the right high-power connector. Note that the limiting factor is often the cable and not the connector, so special attention is required in selecting the cable too.

The chart below was built based on the maximum derated current until a temperature rise of 180°C was reached. It is intended as a guide only, when used with the stated cable sizes on the plug and socket. It's the designer's responsibility to consider all physical and environmental factors which may affect de-rating. Please feel free to contact your LEMO representative to assist in selecting appropriate connector solutions.

Special backshell

In addition to standard mold stop and standard heatshrink molded shapes backshell, M Series connectors offers 3 different special backshell allowing for various cable assembly attachments.

- The straight backshell offers a simple design allowing to either use a crimp ring or a spring for shielding attachment.
- The MIL-DTL-38999M (series III) offers the matching screw geometry allowing the use of standard D38999 compatible backshells.
- Cable collet version allow the assembly of the connector with a standard collet or a collet for bend relief without the need of heat-shrink or additional tools.

Note: ¹⁾ MIL-DTL-38999M (series III) backshell connector size code (backshell not supplied) (not available in MM and 0M size).

Special backshell

LEMO offer a choice of M series collets for size 1M, 2M, 3M, 4M in aluminium. The assembly of the connector can be finalised with a cable collet or a collet for bend relief.

Cable collet for bend relief variant

Note: all dimensions are in millimetres.

Pre-terminated cable assembly solution

Pre-terminated connector 0M.511 (Single Pair Ethernet)

- Size 0M with 2 contacts (AWG 26)
- 2.5G base T1 protocol according to IEEE 802.3ch standard
- Allow data transfer up to 2.5 Gb/s and Power over Data Line up to 50W, for distances up to 15 meters
- PUR outer sheath, colour black, halogen free, flame retardant, ROHS

Characteristics	Value
Conductor	Stranded tinned copper
Construction	2x AWG 26
Screen	Aluminium tape, Tinned copper braid 85%
Jacket / Colour	PUR / Black
Temperature range	-40°C / +90°C
Impedance	100 Ω
Rating voltage	60 V

GM Bend relief (TPU)

A bend relief made from thermoplastic polyurethane elastomer can be fitted over LEMO plugs and fixed or free cable sockets that are supplied with nut for fitting such bend relief.

Use the part numbers shown below to order this accessory separately.

Main characteristics

- Material: TPU (Thermoplastic Polyurethane)
- Temperature range in dry atmosphere: -40°C +80°C

Part number	Series	Bend relief		Cable ø	
		A	L	min.	max.
GMA.1B.025.DG	1M	2.5	30	2.5	2.9
GMA.1B.030.DG		3.0	30	3.0	3.4
GMA.1B.035.DG		3.5	30	3.5	3.9
GMA.1B.040.DG		4.0	30	4.0	4.4
GMA.1B.045.DG		4.5	30	4.5	4.9
GMA.1B.054.DG		5.4	30	5.4	6.0

GMA.4B.080.DG ¹⁾	4M	8.0	60	8.0	9.0
GMA.4B.010.DG ¹⁾		10.0	60	10.0	10.9
GMA.4B.011.DG ¹⁾		11.0	60	11.0	11.9
GMA.4B.012.DG ¹⁾		12.0	60	12.0	13.0
GMA.4B.013.DG ¹⁾		13.5	60	13.5	14.5

● Standard ● Special

Note: all dimensions are in millimetres.

Note: ¹⁾ Design may differ from other bend relief, model without stripes.

The last letter «G» of the part number indicates the grey colour of the bend relief. For ordering a bend relief with another colour, see table above and replace the letter «G» by the letter of the required colour.

Note: the selection of pigments, which should remain stable at high temperature, is limited by the new regulations. For this reason, some colours will be a shade different from those used for Thermoplastic Polyurethane (TPU) bend reliefs. The selected solutions represent the best possible compromise.

Ref.	Colour	Ref.	Colour	Ref.	Colour

FGN Crimp ring for overmolding

The crimp rings are used to crimp the outershield of cables before overmolding. It ensures the best possible ground contact and fixture between the cable screen and the connector backshell. This solution is adapted to volume assembly, and when using pressure overmolding.

Part number	Outer ø (mm)	Crimping tool with dies	Kit with two dies
FGN.0M.160.DN	10.0	DPD.99.010.1K	DPD.99.010.1KZ
FGN.1M.160.DN	11.8	DPD.99.012.0K	DPD.99.012.0KZ
FGN.2M.160.DN	15.3	DPD.99.015.8K	DPU.99.015.8K

FGN Constant force spring clips

A range of constant force spring clips are available for use with M Series connectors, which permits repair of cable terminations without having to discard any of the existing braid shield system. When used in conjunction with LEMO heatshrink boots, a fully sealed termination is achieved.

An additional benefit of the constant force spring is that it provides excellent resistance to shock or vibration due to its self-tensioning properties.

Accessories for Fibre Optic

GMA Bend relief (for M series fibre optic model only)

A bend relief can be fitted over LEMO plugs and sockets supplied with a specific collet nut.

These bend relieves are available in different colours and two different materials. TPU (Thermoplastic Polyurethane) is the standard choice for most applications. Silicone elastomer VMQ option can be selected where the applications required a wide temperature range (silicone material keeps a good flexibility over the full temperature range).

Main characteristics

- Material: TPU (Thermoplastic Polyurethane)
- Temperature range in dry atmosphere: -40°C +80°C
- Material: Silicone elastomer VMQ
- Temperature range in dry atmosphere: -60°C +200°C
- Temperature range in water steam: +140°C

Part number (Polyurethane)	Series	Part number (Silicone)

Assembly instructions

For cable mounted models

① heatshrink boot option to be ordered separately

Cable preparation

- Remove cable jacket and resses the shield onto the cable (shield can be temporary fixed using adhesive tape).
- Strip the cable elements using the dimensions specified in the table below. Dimensions must be selected according to the backshell variant in use.

Multipole

Series	Cable stripping length ¹⁾²⁾ (mm)					
	P●● / FG● / FM●			FW●		
	L	S	T ³⁾	L	S	T ³⁾
MM	16	18	3.0	21	18	3.0
0M	16	18	3.5	21	18	3.5
1M	16	18	3.5	21	18	3.5
2M	18	20	3.5	23	20	3.5
3M	18	20	3.5	23	20	3.5

Note:

- ¹⁾ indicative values, may need to be adapted according to your cable construction and specific pin allocation.
²⁾ low power contact.

① heatshrink boot to be placed on cable if desired

Contact crimping

Multipole versions

- Fix the appropriate positioner onto the crimping tool (see page 55).
- Set the tool selector on the corresponding AWG. Crimping tool setting can be found on the positioner label.
- Insert the conductor into the contact barrel ②; make sure that the conductor is visible through the contact's inspection hole.
- Slide the conductor-contact assembly into the crimping tool and push the contact fully into the positioner.
- Proceed with crimping and check that conductor is securely crimped in the contact. Also check that the conductor is still visible in the contact inspection hole.

High Power versions

- Select the appropriate crimping tool (see page 58).
- Insert the conductor into the contact barrel ②.
- Slide the conductor-contact assembly into the crimping tool.
- Proceed with crimping and check that conductor is securely crimped in the contact. Also check that all conductor strands are securely fixed into the contact barrel.
- Place the supplied heatshrink tube to cover the crimped zone and cable inner jacket.
- Retract the heatshrink tube in the desired position using a heat gun.

Contact insertion

Multipole versions

- Arrange the conductor-contact assemblies according to the desired pin layout.
- Push the contact firmly into the insulator until mechanical click can be felt. The use of tweezers can facilitate contact insertion.
- Check that all contacts are correctly located in the insulator by verifying:
 - 1) the alignment of the contacts at the front of the insulator.
 - 2) by gently pulling on each conductor to verify that they are properly secured into the insulator.
- In case a crimp contact must be disassembled from insulator extraction tool can be found on page 55.

High Power versions

- Arrange the conductor-contact assemblies according to the desired pin layout (multipole only).
- Insert the contact into the insulator, aligning the anti-rotation flats of the contact with the corresponding anti-rotation lugs inside the insulator.
- Push the contact firmly into the insulator until mechanical click can be felt.
- Check that the contact is correctly secured by gently pulling on the conductor.

Braid connection

- Bring the braid around the backshell of the connector.
- Position the braid fixing accessory (tie-wrap or constant force spring clips, to be ordered separately).
- Proceed to braid fixing accessory installation using the dedicated tool.
- Recess the excess braid over the braid fixing accessory and trim the excess length.

Bend relief installation

Heatshrink boot versions

- Position the heatshrink boot (to be ordered separately) over the backshell by taking special care of keeping the braid in position under the boot.
- Gently retract the heatshrink boot using a heat gun.

Overmolding versions

- For overmolding versions previous steps like contact insertion might need special preparation according to overmolding process in use. Contact us for details on specific overmolding preparation.

Note: the elbow version is not recommended for High Power versions.

Technical characteristics

Materials and treatments

Component	Shell material code ¹⁾			Material (Standard)
	X	C	F	
Outer shell, conical nut, coupling nut	● ²⁾			Aluminium alloy
		●		Brass
			● ²⁾	Brass
Earthing crown			●	Bronze or special brass
Hexagonal nut		●	●	Brass
	●			Aluminium alloy
Male crimp contact			●	Brass
Female crimp contact		●		Bronze
Clips		●		Cu-Be or special steel
Insulator		●		PEEK
Ratchet		●		Special PEEK
O-ring	●			FPM/FKM
	●	●	●	EPDM (HY●)
	●	●	●	Silicone
Sealing resin	●	●	●	Epoxy
	●	●	●	Silicone
Cable rear seal	●	●	●	Fluorosilicone
Spring		●		Stainless steel

● Standard ● Special

Note: standards for surface treatment are as follows: chrome-plated SAE AMS 2460; nickel-plated SAE AMS QQ N 290 or MIL DTL 32119; gold-plated ISO 27874.

¹⁾ X = Nickel-plated aluminium alloy.

C = Chrome-plated brass.

F = Nickel-plated brass.

²⁾ anthracite colour.

Housing compatibility

LEMO recommends using matching housings to maintain optimal corrosion resistance and overall connector performance. Mixing different housing materials may compromise durability in harsh environments.

Electrical performance

Characteristics	Value	IEC international	MIL-spec tests
Insulation resist. (at ambient temp.) ¹⁾	> 10 ¹² Ω, > 10 ¹⁰ Ω (after humidity)	IEC 60512-3-1 test 3a	EIA-364-21
Dielectric withstanding volt. (sea level)	See insert configuration	IEC 60512-4-1 test 4a	EIA-364-20
Contact resistance ²⁾	See table below	IEC 60512-2-1 test 2a	EIA-364-06
Current rating	See insert configuration	IEC 60512-5-1 test 5a	
Shell to shell conductivity	< 1.5m Ω	IEC 60512-2-6	EIA-364-83
Shielding effectiveness, low frequency	≥ 80 dB up to 1GHz		EIA-364-66
Shielding effectiveness, high frequency	≥ 70 dB (3GHz), ≥ 58 dB (6GHz), ≥ 40 dB (10GHz)		EIA-364-66

Contact resistance ²⁾ IEC 60512-2 test 2a								Value
0.5	0.7	0.9	1.3	4.0	5.0	6.0	8.0	ø A (mm)
≤ 8.3	≤ 5.7	≤ 4.2	≤ 2.9	≤ 0.3	≤ 0.25	≤ 0.2	≤ 0.2	mΩ

Note:

¹⁾ after humidity test: 21 days at 95% RH according to IEC 60068-2. Insulation resistance measured between the contacts and contact/shell.

²⁾ after 3000 mating cycles and the salt spray test according to IEC 60068-2-11 test Ka.

Mechanical performance

Characteristics	Value	IEC international	MIL-spec tests
Endurance	3000 cycles	IEC 60512-5 test 9a	EIA-364-09
Gunfire vibration	25 to 2000 Hz, 3 axis (Apache helicopter)		MIL-STD-810F method 519.5
Vibration-Sine ^{1) 2)}	30 g, 3 axis, 12 hr		MIL-STD-202 method 204-G
Vibration-Random ²⁾	50-2000 Hz, 37.8 g rms-3 axes; 4h amb	IEC 60512-6-4	EIA-364-28 test cond. V letter I
Shock ²⁾	300 g - 3 msec	IEC 60512-6-3	EIA-364-27 condition D
Acceleration	50 g acceleration		MIL-STD-1344 - 2011-1, A
Torque	See table below		

Note: ¹⁾ amplitude: 30g. Frequency: 10 to 2000 Hz. Time per axis: 4 hours (X, Y, Z). ²⁾ no signal discontinuity above 1 μs.

Plug mating/unmating torque

Series	Coupling torque tightning (N.cm)	Coupling torque untightning (N.cm)	Series	Coupling torque tightning (N.cm)	Coupling torque untightning (N.cm)
MM	8	4	TM	26	30
0M	4	5	4M	26	25
1M	10	11	LM	48	43
2M	20	14	5M	91	54
3M	34	29			

Note: indicative values, tightening torque may vary depending on insert configuration.

Environmental performance

Characteristics	Shell material	Value			
		-55°C/+200°C ¹⁾	-20°C/+200°C ¹⁾	-20°C/+80°C	-65°C/+180°C
Standard models operating temperature	Code X	F●●, P●● ²⁾	E●●, P●●	HE●	HE● ²⁾ , HY●
	Code X ²⁾ , C or F	F●●, E●●, P●●	–	HE●	HE● ²⁾ , HY●

Note:
¹⁾ for short periods of use.

²⁾ variant with silicone resin and/or o-ring.

Characteristics	Value	IEC international	MIL-spec tests
Ingress protection index (mated)	IP68 (at 20 m, 2 h)	IEC 60529	
Fungus	Satisfied - by material analysis		MIL-STD 810F-508.5
Flammability	60 sec. front and back face		EIA-364-104A
Fluid contamination ¹⁾	Fuels, gasoline, hydraulic oils, solvents, de-icing		MIL-STD-810F method 504
Sand and dust ²⁾	6 h, 55°C, blowing < 150 µm dust		MIL-STD 810F-510.4
Lightning strike	10 K amps - 6 times		EIA-364-75
Altitude-low temp ³⁾	-65°C; 40'000 feet and 400 VAC		EIA-364-105A
Salt fog ⁴⁾	48 hours (shell material code X)	IEC 60068-2-11 test Ka	EIA-364-26
	> 1000 hours (shell material code C or F)	IEC 60068-2-11 test Ka	EIA-364-26
Thermal shock (standard models)	5 cycles: -65°C to +150°C	IEC 60512-11-4	EIA-364-32 test condition IV
Altitude immersion	No moisture on contacts		EIA-364-03
Humidity	21 days at 95%	IEC 60068-2	EIA-364-31 method IV
Safety	IP2X finger protection for high power connectors	IEC 60529	

Note: ¹⁾ connectors immersed at both 70°C and 25°C according to specification. Connectors are then inspected, no visual signs of damage seen.
Fuels: Kerosene, JP4, (Nato F40) at 70°C +/- 2°C. Gasoline: ASTM 4814. Hydraulic oils: Mineral oil based MIL-H-5606.

Solvents: Isopropanol. De-icing fluids: 25% ethylene glycol.

²⁾ no signs of damage, connectors opened and closed without difficulty. Dust or sand was not inside connector.

³⁾ wired mated connectors = no voltage breakdown, shell to all contacts (connected together) w/400 VAC after 1 hour at -65° C at 40'000 feet altitude.

⁴⁾ corrosion resistance. Inspection: salt deposits shall be removed by gentle wash in running water with light brushing using soft brush.

Note

Product safety notice & Disclaimers

PLEASE READ AND FOLLOW ALL INSTRUCTIONS CAREFULLY AND CONSULT ALL RELEVANT NATIONAL AND INTERNATIONAL SAFETY REGULATIONS FOR YOUR APPLICATION.
IMPROPER HANDLING, CABLE ASSEMBLY, OR WRONG USE OF CONNECTORS CAN RESULT IN HAZARDOUS SITUATIONS.

1. SHOCK AND FIRE HAZARD

Incorrect wiring, the use of damaged components, presence of foreign objects (such as metal debris), and / or residue (such as cleaning fluids), can result in short circuits, overheating, and / or risk of electric shock.

Mated components should never be disconnected while live as this may result in an exposed electric arc and local overheating, resulting in possible damage to components.

2. HANDLING

Connectors and their components should be visually inspected for damage prior to installation and assembly. Suspect components should be rejected or returned to the factory for verification.

Connector assembly and installation should only be carried out by properly trained personnel. Proper tools must be used during installation and / or assembly in order to obtain safe and reliable performance.

3. USE

Connectors with exposed contacts should never be live (or on the current supply side of a circuit). Under general conditions voltages above 30 VAC and 42 VDC are considered hazardous and proper measures should be taken to eliminate all risk of transmission of such voltages to any exposed metal part of the connector.

4. TEST AND OPERATING VOLTAGES

The maximum admissible operating voltage depends upon the national or international standards in force for the application in question. Air and creepage distances impact the operating voltage; reference values are indicated in the catalogue however these may be influenced by PC board design and / or wiring harnesses.

The test voltage indicated in the catalogue is 75% of the mean breakdown voltage; the test is applied at 500 V/s and the test duration is 1 minute.

5. CE MARKING

CE marking  means that the appliance or equipment bearing it complies with the protection requirements of one or several European safety directives. CE marking  applies to complete products or equipment, **but not to electromechanical components, such as connectors.**

6. PRODUCT IMPROVEMENTS

The LEMO Group reserves the right to modify and improve to our products or specifications without providing prior notification.

7. WARNING (Prop 65 State of California)

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. LEMO products are exempt from proposition 65 warnings because they are manufactured, marketed, and sold solely for commercial and industrial use.

For further information, please visit: <https://web.lemo.com/img/resources/quality/LEMO-Prop-65-compliance-declaration.pdf>

8. UL RECOGNITION

LEMO connectors are components recognized by the Underwriters Laboratories (UL), facilitating the UL approval of the complete system (including LEMO connector, cable and your equipment).

9. REACH AND ROHS

LEMO connector specifications comply with the requirements of the RoHS directive (2011/65/EU) and REACH regulation (1907/2006/EU) of the European Parliament and latest amendments. These REACH and ROHS regulations specify the restrictions of the use of hazardous substances in LEMO products marketed in Europe.

DISCLAIMERS

LEMO works constantly to improve the quality of its products; the information and illustrations figuring in this document may therefore vary and are not binding. In any case, LEMO makes no specific warranty of merchantability, fitness for a particular purpose, third party components as such or included in assembly, non-infringement, title, accuracy, completeness, or security. The user is fully responsible for his products and applications using LEMO component.

In no event shall LEMO, its affiliates, officers, agents or employees be liable for any incidental, indirect, special or consequential damages in connection with the products or services provided by LEMO, including (without limitation) loss of profits or revenues, interruption of business, loss of use of the products or any associated equipment, materials, components or products, damages to associated equipment or in combination with other components, materials.

Reproduction of significant portions of LEMO information in LEMO data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. LEMO is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.
